- Honest business practices.
- Safe working environment.
- Gender equality and women empowerment.
- Sustainable production practices.

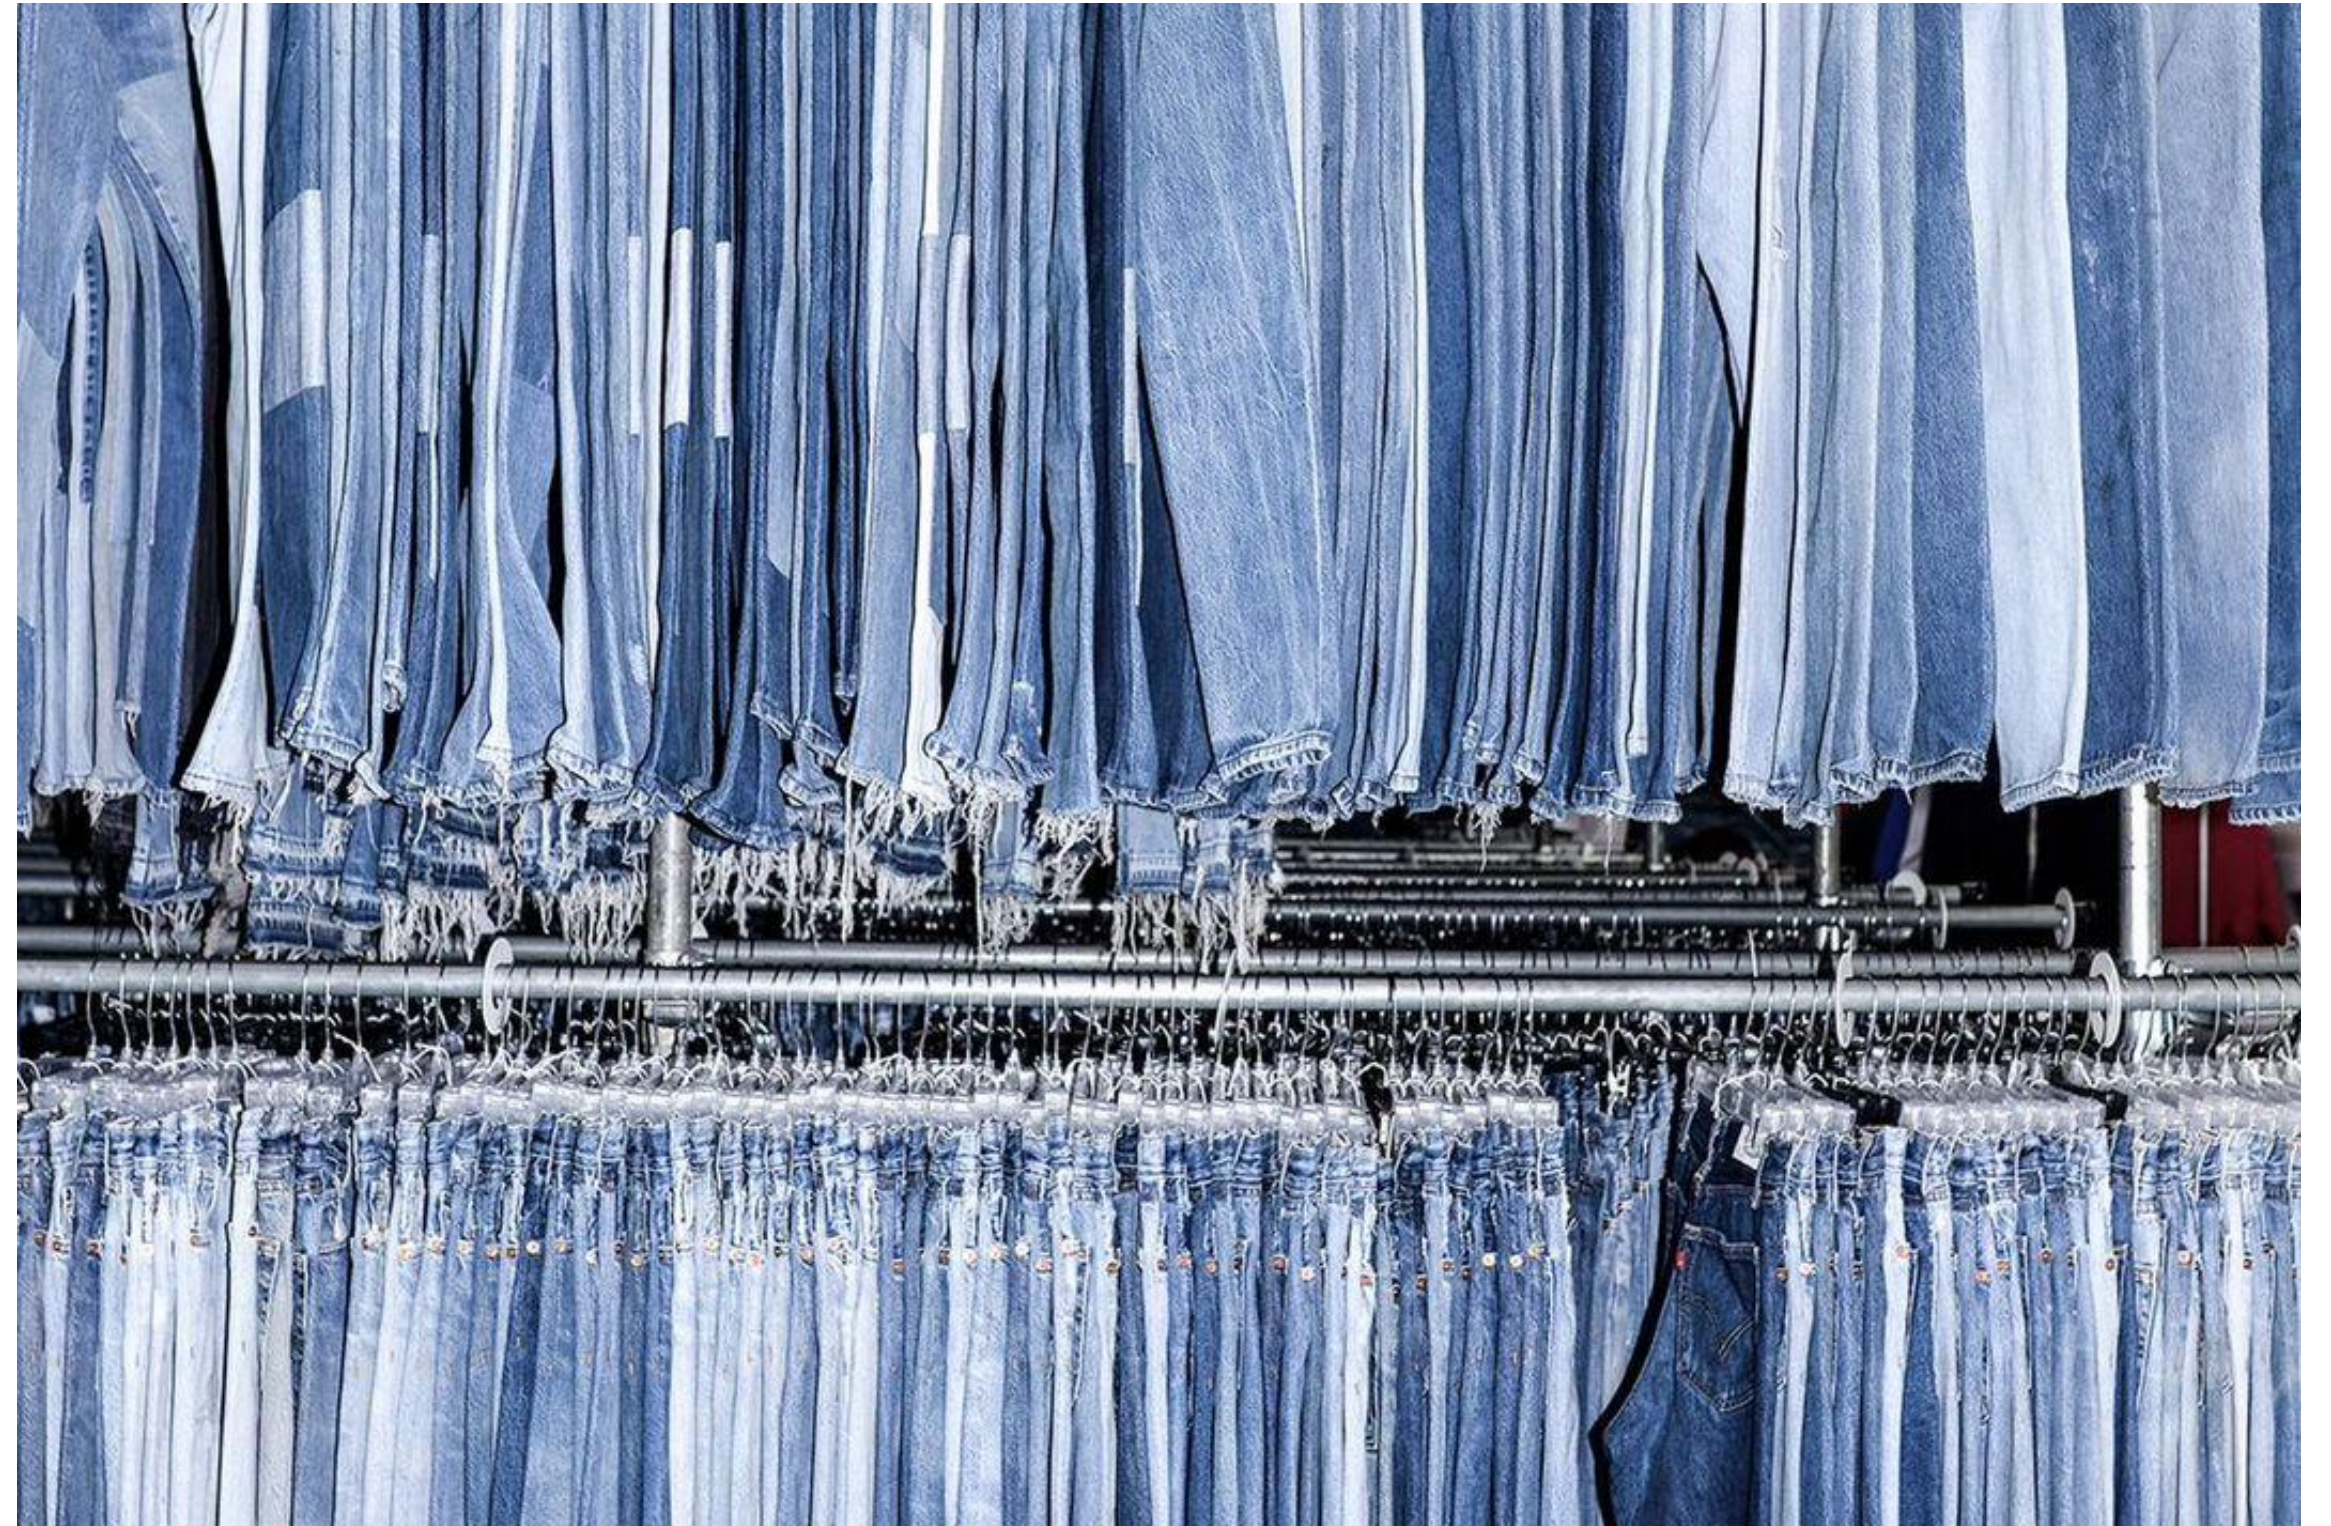

---

As part of a developing economy we see it as our responsibility to support and give back to the community in which we operate.

# R&D DEV

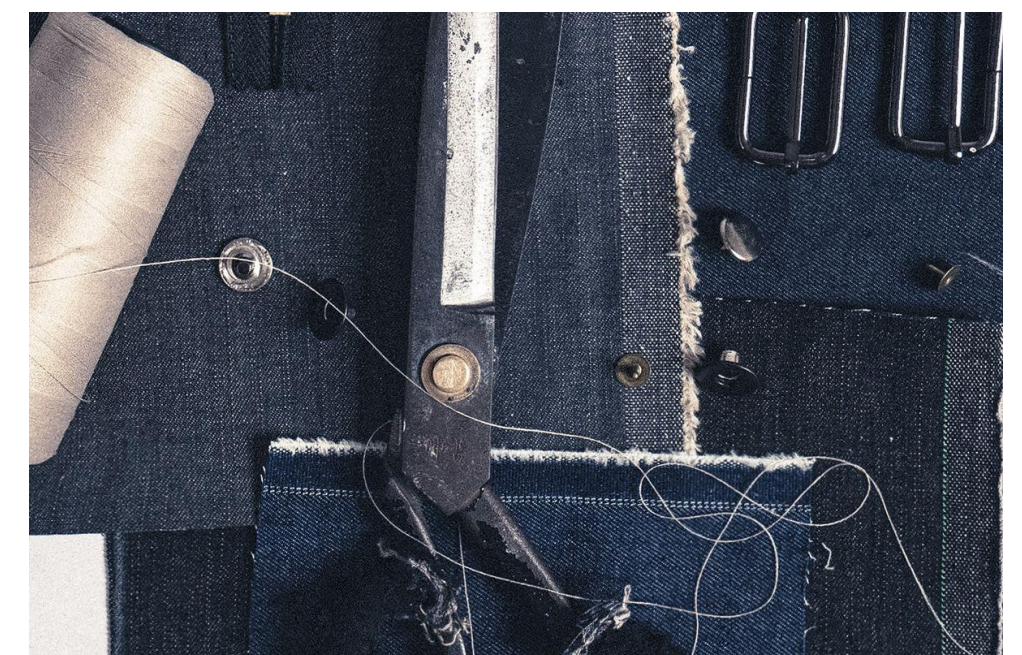

PRODUCT DEVELOPMENT  
CENTRE

We strive to stay at the forefront of fashion and trends to keep up with the market and anticipate the next major trends.

# SUSTAINABILITY

We are committed to sustainability and follow eco friendly practices at every stage of production from sourcing materials to making the final garments.

# SUSTAINABLE FABRICS

To incorporate sustainable fibers in our manufacturing. We have partnered with the leading mills of sustainable fabrics in Pakistan. We are pleased to offer cutting edge sustainable fibers such as :

100% BCI Cotton  
(Better cotton Initiative)

Wood based  
fibers (Lenzing)

Post consumer  
waste yarn

Alternative Fibers

Organic cotton

Industrial waste  
yarns

# CERTIFICATIONS

Denim Crafts has implemented the Business Social Compliance Initiative (BSCI) to ensure that all of its suppliers and partners adhere to the highest standards of labor and environmental practices. Through BSCI, Denim crafts is able to monitor and assess the working conditions of its suppliers and take action to address any issues that may arise.

Denim crafts uses Oeko Tex certified materials in their products to ensure that they are environmentally friendly and free from harmful chemicals. Oeko Tex is a global standard for textile production that ensures that the materials used are safe for human use and do not have any negative impact on the environment.

Denim crafts often use CTPAT (Customs-Trade Partnership Against Terrorism) to ensure the safety and security of their supply chain. This involves implementing strict protocols and procedures to prevent unauthorized access to materials and products. CTPAT also requires regular audits and assessments to ensure that all security measures are being properly followed and maintained. By following these guidelines, denim crafts can protect their customers and employees from potential threats and ensure the integrity of their products.

By implementing SEDEX, Denim Crafts businesses can demonstrate their commitment to ethical and sustainable production, which can attract customers who value socially responsible products. Additionally, SEDEX helps businesses identify areas for improvement and provides guidance on how to make positive changes in their supply chain.

# CERTIFICATIONS

Denim crafts is a company that is committed to sustainability and reducing its impact on the environment. One way that they do this is by adhering to the global recycling standard. This standard ensures that all materials used in the production of their products are recycled and repurposed in a responsible and ethical manner.

To implement the ZDHC Road Map to Zero, Denim Crafts follows a set of guidelines and standards that outline best practices for reducing the use and discharge of hazardous chemicals in their production processes. These guidelines cover a wide range of areas, including chemical management, wastewater treatment, and environmental performance.

Denim Crafts uses the Higg Index to assess and measure the sustainability of their manufacturing processes and supply chain. By using this tool, Apex is able to identify areas for improvement and implement strategies to reduce their environmental impact. The Higg Index also allows Apex to track their progress and make data-driven decisions to continuously improve their sustainability efforts. By using the Higg Index, Apex is able to ensure that they are producing high-quality, sustainable products for their customers.
